

# TEETH WHITENING PROS AND CONS

Teeth whitening is a cosmetic dental treatment that utilizes whitening products to make patients teeth appear to be whiter and brighter. Hydrogen peroxide and carbamide peroxide are the most common whitening agents used in teeth whitening treatment. Patients may choose to whiten their teeth at home, or schedule an appointment for professional whitening.

## PROS

- patients appear more attractive
- confidence boost
- lessens appearance of wrinkles
- makes you seem successful
- patients appear younger
- does not damage enamel

## CONS

- sensitive teeth post treatment
- can cause slight bleaching to gums
- cannot be used on veneers or crowns
- some treatments are expensive
